Abstracts

The UK milk protein market size was estimated at USD 692.7 million in 2024 and is projected to reach USD 1,180.5 million by 2033, growing at a CAGR of 6.1% from 2025 to 2033. The market is driven by increasing consumer awareness of health and wellness, as well as a growing aging population, which in turn increases demand for protein-enriched products.

For instance, according to the Centre for Ageing Better, the UK has a significant aging population, with 38% (around 22 million) people aged 50 and above and 19% of people (around 11 million) aged 65 and over in 2025, representing a large and growing consumer base for protein-enriched and health-focused products. Trends in fitness and sports nutrition are expected to drive the industry growth in the UK over the coming years. Consumers of all ages are adopting active lifestyles and using protein-enriched products, such as shakes, bars, and ready-to-drink beverages, to improve their strength and endurance. Focus on functionality, ease of use, and well-rounded nutrition supports the demand for milk proteins as a reliable and efficient source of protein.

The milk protein industry is driven significantly by innovation in food and beverage products. Food manufacturers are constantly developing new high-protein products that span yogurts and dairy-based snacks, bakery products, and even hybrid dairy and plant protein blends. For instance, in March 2025, Lactalis UK & Ireland introduced a new protein range from Lindahls to tap into the growing consumer interest in low-fat dairy products that are high in protein. The product line includes Cottage Cheese, Gouda Slices, Greek Cheese, Quark, and Two Protein Milk Drinks with added collagen protein

for health-conscious consumers aged 45 and above who exercise regularly and seek protein for weight management and muscle recovery.

Ongoing innovations and product launches aim to meet changing consumer preferences for taste, convenience, and health/nutritional benefits, while further extending the reach of milk proteins into various consumer segments and products.
