Unified Communication As A Service Market Growth & Trends

The global unified communication as a service market size is expected to reach USD 262.37 billion by 2030, according to a new report by Grand View Research, Inc. It is expected to expand at a CAGR of 20.6% from 2022 to 2030. Increasing preference towards combining unified communication with IoT is providing new opportunities in the market, as the adoption of cloud solutions and services showing significant increment over the past years as enterprises are adopting artificial intelligence and machine learning-enabled solutions for communication which gives a path to boost the market in the future. Organizations are deploying AI-enabled UCaaS for strategy planning, decision-making, and workflow structuring.

UCaaS provides enterprises a way to roll out an effective way of communication without having any investment in the infrastructure of IT, which makes SMEs adopt UCaaS solutions for doing their unified communication at affordable rates. In the wake of the pandemic, few small enterprises use UCaaS as a solution to roll out a hybrid working model, as it has benefits such as affordable prices and operational flexibility, which are expected to impact the market over the forecast period positively.

The public sector in every country is rapidly analyzing and discovering the way to use
