U.S. Ambulatory Services Market Growth & Trends

The U.S. ambulatory services market size is anticipated to reach USD 417.8 billion by 2030, expanding at a CAGR of 5.38% from 2024 to 2030, according to a new report by Grand View Research, Inc. Ambulatory services are generally more cost-effective than inpatient care, making them an attractive option for patients and insurance providers. Advances in medical technology have enabled the development of minimally invasive procedures, point-of-care diagnostics, and telemedicine, which have significantly improved the accessibility and quality of ambulatory care services.

Ambulatory services often prioritize patient-centered care, focusing on the individual's needs, preferences, and overall well-being. This patient-centric approach has gained popularity among patients and healthcare providers alike, driving the growth of the market. The rising prevalence of chronic diseases, such as diabetes, hypertension, and heart disease, has created a need for ongoing ambulatory care services to manage these conditions effectively. According to the Centers for Disease Control and Prevention, in May 2023, Heart disease is the leading cause of death for men, women, and people of most racial and ethnic groups in the U.S. that in turn, drives the market growth.

U.S. Ambulatory Services Market Report Highlights

Based on type, primary care offices dominated the market with more than 48% share in 2023 owing to improved quality of care and application of advanced technologies involved in the segment

The surgical specialty segment is expected to grow at the fastest CAGR over the forecast period

Sedentary lifestyle, increasing incidences of chronic disorders and the increase in the aging population are contributing to the growing demand of ambulatory services

Market players operating in U.S. ambulatory services market include Envision Healthcare Corporation, Surgery Partners, NueHealth, Terveystalo Healthcare, Aspen Healthcare, AQuity Solutions

In May 2022, USA Health announced the start of the construction of USA Health's ambulatory surgery center in Baldwin County. This resulted in making patients receive outpatient surgery more efficiently.
