## **Abstracts**

The U.S. dental tourism market size was estimated at USD 634.19 million in 2024 and is expected to reach USD 3,166.67 million by 2033, growing at a CAGR of 19.76% from 2025 to 2033. Cost savings drive this growth, as dental procedures abroad are cheaper than in the U.S., even when including travel and lodging expenses. Limited dental insurance coverage for certain procedures encourages citizens to seek care overseas. Moreover, long wait times for specialized treatments in the U.S. and the availability of high-quality care in countries such as Mexico, Costa Rica, and Thailand further boost market growth. In addition, lifestyle factors such as combining dental care with vacation travel, along with the rise of online platforms that facilitate research, reviews, and appointment booking abroad, also significantly drive market demand.
