Abstracts

The U.S. docks market size was estimated at USD 4.3 billion in 2025 and is projected to grow from USD 4.4 billion in 2026 to USD 5.7 billion by 2033, at a CAGR of 3.7% from 2026 to 2033. The U.S. docks market is supported by recreational boating, waterfront residential development, marina infrastructure, and commercial marine activities.

Docks provide access to lakes, rivers, coastal areas, and other water bodies for boat mooring, passenger movement, fishing, and waterfront recreation. Residential property owners use private docks for boat storage and leisure activities, while marinas and commercial facilities require larger structures to accommodate multiple vessels and support marine operations. Demand also comes from public waterfront facilities, tourism destinations, and industrial locations requiring water access.

Market development is influenced by recreational boating participation, waterfront property ownership, marina capacity requirements, and investment in coastal and inland water infrastructure. Residential customers prioritize durability, ease of installation, low maintenance, and compatibility with their waterfront properties. Commercial buyers focus on structural strength, operational reliability, load-bearing capacity, and long-term maintenance requirements. Material selection plays an important role, with wood, aluminum, steel, concrete, and composite materials serving different applications.

Technological developments are improving dock durability, installation flexibility, and maintenance efficiency. Modular floating docks and interlocking dock systems allow users to configure layouts according to shoreline conditions, available space, and changing operational requirements. Recycled polymers and composite materials offer alternatives to conventional materials where resistance to moisture, corrosion, and routine maintenance is important. Tool-free assembly systems and lightweight components can simplify transportation, installation, seasonal removal, and expansion.

U.S. Docks Market Report Segmentation

This report forecasts revenue growth at regional & country levels and provides an analysis on the industry trends in each of the sub-segments from 2021 to 2033. For the purpose of this study, Grand View Research has segmented the U.S. docks market on the basis of material, substructure material, product type, application, and dock accessories:

Material Outlook (Revenue, USD Million, 2021 - 2033)

- Wood
- Metal
- Aluminum
- Others
- Plastics
- Composites
- Concrete

Substructure Material Outlook (Revenue, USD Million, 2021 - 2033)

- Wood
- Metal
- Aluminum
