## **Abstracts**

The U.S. drug testing market size was estimated at USD 2.62 billion in 2025, projected to reach USD 4.13 billion by 2033, expanding at a CAGR of 5.89% from 2026 to 2033. The growth of the market is driven by rising prevalence of substance abuse, stringent regulations requiring drug & alcohol testing, and growing government efforts to curb substance abuse in the U.S.

According to the Substance Abuse and Mental Health Services Administration (SAMHSA) 2024 national survey on drug use and health, about 73.6 million Americans aged twelve or older (25.5%) reported using illicit drugs in the past year. Cannabis remains the commonly used illicit drug, with around 64.2 million users, followed by substances such as hallucinogens, prescription opioids, and cocaine.

Furthermore, growing emphasis on workplace safety and compliance across industries is also supporting the expansion of the U.S. drug testing market. Many employer liability issues are driving the adoption of pre-employment, random, and post-incident drug testing programs, supporting market demand. The expansion of drug testing across workplaces and healthcare settings further contributes to growth. Moreover, the U.S. government actively promotes national campaigns to raise awareness about the dangers of substance abuse. Programs such as “National Drug & Alcohol Facts Week” and the DEA’s educational outreach provide schools, communities, and workplaces

with resources to prevent drug misuse.

The increasing prevalence of substance abuse in the U.S. has significantly raised the demand for drug testing solutions. The ongoing opioid crisis has also increased the need for monitoring and testing programs across healthcare, workplace, and law enforcement sectors. According to the Centers for Disease Control and Prevention (CDC), the U.S. recorded over 107,000 drug overdose deaths in 2023, highlighting the serious public health impact of drug misuse. These rising cases of substance misuse and overdose are encouraging governments, employers, and healthcare providers to adopt regular drug screening and monitoring programs, which is supporting the growth of the U.S. drug testing market.
