### **Water Flosser Market Growth & Trends**

The global water flosser market size is expected to reach USD 1.23 billion by 2028, according to a new report by Grand View Research, Inc. It is expected to expand at a CAGR of 5.3% from 2021 to 2028. Increasing general public awareness regarding oral health care and demographic changes such as age and diversity of population result in an increased focus on oral care, subsequently driving the demand for water flossers.

An increase in effective prevention and treatment efforts by communities and government associations is helping raise awareness about better oral care. For instance, community water fluoridation in the U.S. benefits about 7 of 10 Americans who get water through public water systems. Community water fluoridation helps control the adjustment of fluoride in public water supply systems in order to help prevent tooth decay. These initiatives have resulted in consumers considering oral health as one of the basic health measures.

According to the WHO, severe periodontal (gum) disease, which results in tooth loss, is also a common problem with 10% of the global affected population. Chronic periodontitis affects 47.2% of adults over the age of 30 in the U.S. The effectiveness of water flossers against gum diseases has made this a product of vital importance for those who suffer from chronic periodontitis, thereby boosting the adoption of water

flossers. According to several six-month studies conducted during the 1990s on periodontal maintenance patients, it is suggested that water flossers improve the oral health of the demographic by reducing bleeding on probing (BOP) by half in the six-month period.

Cordless water flossers led the global market in 2020, driven by the increasing demand for feasible and portable electronic gadgets. According to clinical findings, these products are 93% more effective in reducing gum bleeding than string floss and 52% more effective in reducing gingivitis. Recognizing the high demand for these products, an increasing number of manufacturers have been aiming to tap into the cordless flosser segment. Some of the most highly recommended and commonly preferred cordless water flossers are Waterpik Cordless Advanced, Waterpik Cordless Plus, Panasonic Dental Water Flosser EW-DJ10-A, and Waterpik Cordless Freedom.

The dental clinic application segment accounted for the largest share of more than 56.0% in 2020. The growing demand for professional dental care due to the rising cases of oral diseases is a key factor driving the segment. According to the United Health Foundation, in 2019, 67.6% of adults in the U.S. reported visiting the dentist or dental clinic that year.
