Water Recycle And Reuse Market Trends

The global water recycle and reuse market size was estimated at USD 16.13 billion in 2023 and is anticipated to grow at a CAGR of 9.7% from 2024 to 2030. The increasing scarcity of freshwater resources, rising environmental awareness, and stringent regulations on wastewater discharge are driving the demand for water recycling and reuse solutions. Water recycling and reuse involve the treatment of wastewater to make it suitable for various non-potable and potable applications. The process helps conserve water resources, reduce pollution, and promote sustainable water management practices.
