Abstracts

The global weaving machinery market size was valued at USD 5.3 billion in 2025 and is projected to grow from USD 5.6 billion in 2026 to USD 8.5 billion by 2033, at a CAGR of 6.2% from 2026 to 2033. Asia Pacific dominated the market with the largest revenue share of 49.7% in 2025. The market is driven by sustained demand for woven fabrics across apparel, home textiles, technical textiles, and industrial applications.

Textile manufacturers are increasing investments in advanced looms to expand production capacity, maintain fabric uniformity, and accommodate a broader range of yarns and fabric constructions. Modernization of aging equipment and expansion of textile manufacturing facilities in key production regions are further supporting machinery demand. In addition, the adoption of digital technologies is influencing equipment selection as manufacturers seek greater visibility into machine performance, production parameters, and maintenance requirements.
