SUMMARY

Bioreactors and fermenters are used for creating proper environment for the growth of microorganisms or driving biochemically active substances derived from such organisms. Fermenters are basically utilized for the growth and maintenance of a population of bacterial or fungal cells in a controlled mode. Bioreactors, the large sized fermenters, are widely used in biopharmaceutical industry for the production of biologics such as monoclonal antibodies, recombinant proteins, and vaccines at a large scale. Bioreactors and Fermenters classified by type (Single-use Bioreactors and Multiple-use Bioreactors), by application (Biopharmaceutical Companies, CROs, Academic and Research Institutes).

This report includes market status and forecast of global and major regions, with introduction of vendors, regions, product types and end industries; and this report counts product types and end industries in global and major regions.
