SUMMARY

Hydraulic Bolt Tensioner has a hydraulic body which, using a hydraulic fluid, exerts a strong tension load on the bolt through the brace screwed on that bolt. The body also rests on the skirt in order to apply the reaction force on the assembly to be tightened. Hydraulic bolt tensioning is the fast, simple, safe, and accurate method of tightening bolts and studs. Bolt tensioning involves multiple bolts in a flanged joint being tightened simultaneously. The bolt tensioners are linked together by hydraulic hoses, ensuring that each bolt is tightened with exactly the same force. This results in a uniform load on the gasket in the flanged joint
