SUMMARY

Location analytics blends business data with geographic data to reveal the relationship of location to people, events, transactions, facilities and assets. Traditionally, location data has been relegated to mapping and GIS purposes. But geo-mapping software, like other business software, has become easier to use. And BI and analytics software vendors are integrating mapping and spatial data analysis into their products to provide additional context to visualizations, reports and analysis. Location analytics is the process or the ability to gain insight from the location or geographic component of business data.

HeyReport estimates that the Location Analytics market size will grow from xxx Million USD in 2020 to xxxx Million USD by 2025, and with a CAGR of xx%. The base year considered for this report is 2019, and the market forecast is projected from 2021 to 2025.
