SUMMARY

Anti-Reflective Glass is a specialised glass product that has been treated to reduce the amount of surface reflection seen from the face of the glass. It is a glass that has been optically coated on one or two sides to diminish reflections and increase the light transmission, to reduce surface glare and increase substrate transmission and brightness offering better contrast definition by reducing surface reflection over a specific wavelength range. Ghost images and multiple reflection can be minimized and possibly eliminated by applying an AR coating on the glass surface
