SUMMARY

Licorice extract comes from the licorice plant. The root of the plant is primarily used in preparing the extract, and the hard woody plant is pulped then boiled to further extract and refine the contents. Licorice extract is a natural ingredient often found in both food and herbal medicine supplements. While the full medicinal effectiveness of licorice has not been completely tested, some benefits have been proven and others have enough support to warrant its inclusion in a number of supplements. Often found in teas and used in a number of different products as a flavoring ingredient, licorice extract can provide help in treating stomach issues such as heartburn, but does have some noteworthy side effects that should be considered.
