SUMMARY

A release liner is a material made up of paper or plastic which functions as a carrier for the pressure-sensitive label stock. It has specialized non-stick coatings on one or both ends. It is coated with a release agent on one or both sides, which prevents it from making bonding with the material. The release agent stimulates release effect against any material coated with adhesives. Release liners protect the adhesive prior to its initial application. Release liners come in different forms such as in paper or plastic films and can be printed or non-printed. Primarily release liners are made up from glassine or super calendered kraft paper. In this report, we only focus on paper and film Release Liners.

HeyReport estimates that the Release Liners market size will grow from xxx Million USD in 2020 to xxxx Million USD by 2025, and with a CAGR of xx%. The base year considered for this report is 2019, and the market forecast is projected from 2021 to 2025.

In this report, HeyReport discusses the Global & USA industrial policies, economic environment, and the impact of covid-19 on the Release Liners industry and its cost structure. Besides, this report covers the basic market dynamics, market size and companies competition data. In addition, the report also conducts basic market research on major product type, market end-use and regional trade.
