## Abstracts

**SUMMARY**

Unlike the traditional POS terminal, Android POS Device can link itself to several checkout terminals in your counter and operated by main computer. With the Android technologies added, the device is programmed; it can track your usage, record sales, monitor updates of dollar changes, calculate orders and payments, and tally inventory sales based on items saved in your system. This POS system gives you control on your business where security control on the cash register have and limit the number of employees who can open this. The Android POS Device is capable of keeping tracks and records of company's sales. Checking the business's profit is much easier compared to tedious manual checking. It can help to improve marketing strategies and technique by analyzing the condition of the business. That's why even small-scale businesses need the help of such device to make their job a lot easier and faster.
