SUMMARY

Annatto is an orange-red condiment and food coloring derived from the seeds of the achiote tree. It is often used to impart a yellow or orange color to foods, but sometimes also for its flavor and aroma. The color of annatto comes from various carotenoid pigments, mainly bixin and norbixin, found in the reddish waxy coating of the seeds. Annatto and its extracts are now widely used in an artisanal or industrial scale as a coloring agent in many processed food products, such as cheeses, dairy spreads, butter and margarine, custards, cakes and other baked goods, potatoes, snack foods, breakfast cereals, smoked fish, sausages, and more. In these uses, annatto is a natural alternative to synthetic food coloring compounds, but it has been linked to cases of food-related allergies.
