SUMMARY

Molten Salt Solar Energy Thermal Storage refers to a kind of thermal energy storage method, which is widely used in the CSP system. Concentrated Solar Power (CSP) (also called concentrating solar power, concentrated solar thermal, and CSP) systems generate solar power by using mirrors or lenses to concentrate a large area of sunlight, or solar thermal energy, onto a small area. Electricity is generated when the concentrated light is converted to heat, which drives a heat engine (usually a steam turbine) connected to an electrical power generator or powers a thermochemical reaction.
