SUMMARY

Explosion Proof equipment is product adopting several types of protection measures to prevent explosions from occurring in hazardous areas such as an unanticipated rise in the energy (chemical, mechanical or nuclear) of the system in an unbridled way accompanied by increase in temperature and release of gases. Explosion Proof equipment does not mean that products will be able to withstand any explosion; instead it means that either the products will contain the source of explosion within its housings built specially for such purposes, or altogether prevent the explosion from happening by adopting certain prevention measures.
