SUMMARY

Hydraulic press is a device using a hydraulic cylinder to generate a compressive force. It uses the hydraulic equivalent of a mechanical lever. These presses are ideal for assembly, straightening, fabrication, quality control, maintenance, product testing, bending, punching and shearing. Press frames are constructed of heavy-duty arc steel and can be easily modified to accommodate a wide range of pressing needs. Because of its advantages, end products are being widely used as important and indispensable component parts in every industrial application. Hydraulic press, especially in the automotive industry has been more and more applications in the industrial field.
