## Abstracts

Summary

Automated Fingerprint Identification Systems (AFIS) is a method in which fingerprints from individuals are stored as digital images in a database. Each fingerprint has features like arches, loops, and whorls that are unique to an individual. The current version of AFIS has been in use only for a few years and has revolutionized the way matches are made. Automated fingerprint identification systems are primarily used by law enforcement agencies for criminal identification initiatives, the most important of which include identifying a person suspected of committing a crime or linking a suspect to other unsolved crimes.
