SUMMARY

Automatic Fare Collection System (AFC) is a contactless smartcard-based end-to-end solution for fare collection and payment. AFC machine is the equipment used in the automatic fare collection system. The elements of AFC system are: Ticket vending machines (TVMs), where passengers can buy a ticket for their journey Ticket office machines (TOMs), used by railway staff to issue tickets at stations Add value machines (AVMs), where passengers having a stored value ticket can increase the residual value. Fare gates, which form a barrier between the "unpaid" area of the station and the "paid" area where passengers must possess a valid ticket. The faregate will read and release the gate when a valid ticket is presented. Tickets, which come in a number of varieties (according to the system in use) but which all have an electronically encoded data content indicating the validity and/or use of the ticket. A computerised accounting and management system, which consists of a station computer for each station and a central computer linked to all the stations.
