Summary

Connectors are critical to today's cars. Without them, it would be nearly impossible to build or service a car. Whenever a bundle of wires passes through or attaches to a component of the car that might have to be removed, there must be a connector there to allow for that removal. A single connector can have more than 100 wires. In the past, unreliable connectors have been the source of many electrical problems. Connectors have to be waterproof (modern connectors have several seals to keep out moisture), corrosion proof and provide good electrical contact for the life of the vehicle

The global Automotive Connectors market will reach Volume Million USD in 2017 with CAGR xx% 2018-2025. The main contents of the report including:
