SUMMARY

Dot peen marking technology allows manufacturers to automate the direct part marking process, ensuring 100% reliable part traceability. Dot peen marking machines use a pneumatically driven marking pin to stamp (or peen) a series of very small, closely spaced dots to form straight or curved lines. Also called pin marking technology, the dot peen marking method provides fast, accurate marks while exerting minimal force on the part surface. Text, logos, and 2D Data Matrix codes can be marked in any size or orientation.
