SUMMARY

A screw is an inclined plane wrapped around a nail. Some screw threads are designed to mate with a complementary thread, known as a female thread (internal thread), often in the form of a nut or an object that has the internal thread formed into it. Other screw threads are designed to cut a helical groove in a softer material as the screw is inserted. The most common uses of screws are to hold objects together and to position objects. The global Drywall Screws market will reach xxx Million USD in 2020 with CAGR xx% 2020-2025. The main contents of the report including:
