## Abstracts

### SUMMARY

Flexible Solar Panel is a kind of thin film solar cell. Flexible solar panels can, as their name suggests, flex. They are also very lightweight and these two characteristics make them useful for camping, rapid transport and deployment in emergencies, and for use on caravans, vehicles, and even airplanes. On buildings they can be applied to curved surfaces or structures where weight is an issue. As they can be glued directly to the surface, existing penetrations don't need to be used or new penetrations made.

The global Flexible Solar Panel market will reach xxx Million USD in 2020 with CAGR xx% 2020-2025. The main contents of the report including:
