## Abstracts

### SUMMARY

Hair extensions are a type of cosmetic product that alters the appearance of natural hair by making it appear longer, thicker, layered, or simply a different style. They can be made with two different types of material — human hair and synthetic hair. Human hair extensions are made from real human hair, while synthetic ones are manmade from a variety of synthetic fibers. The primary advantage of synthetic hair extensions is affordability, as they tend to cost far less and are more readily available.

The global Hair Extension market will reach xxx Million USD in 2019 with CAGR xx% 2019-2025. The main contents of the report including:
