SUMMARY

HMPE is comprised of extremely long molecules (chains) of polyethylene oriented in the same direction, which results in large areas of overlap between the molecules. This overlap greatly increases the bond between the molecules and thereby, the strength of the fibre is greatly increased. When rope is manufactured using this fibre, extremely high strengths can be achieved. Dyneema is the premium brand for High Modulus Polyethylene fibre.

The global HMPE (High Modulus Polyethylene) Ropes market will reach xxx Million USD in 2019 with CAGR xx% 2019-2025. The main contents of the report including:
