Summary

Homeopathy is a medical practice and philosophy based on the principle that human body has the capacity to heal itself. Established in Germany in the late 1700s, homeopathy has been extensively practiced all over Europe. Homeopathy considers symptoms of illness as usual responses of the body as it tries to regain health. Homeopathy is based on the principle that "like cures like." According to this principle, if a substance produces a symptom in a healthy person, giving a very small amount of the same substance to that person may cure the illness. Homeopathic medicines contain extremely dilute amounts of natural substances that are used to treat a variety of ailments. Homeopathic medicines are manufactured by a process of serial dilution and succession (vigorous shaking).
