SUMMARY

Foil stamping, typically a commercial printing process, is the application of metallic or pigmented foil on to a solid surface by application of a heated die onto foil, making it permanently adhere to the surface below leaving the design of the die. And hot foil stamping machine is the tool we used to complete the foil stamping process. Owing to small and medium sized equipment is low-tech, and manufacturers of that are too much. In this report, we focus on precision high-tech large-scale equipment.
