Summary

Jellies and Gummies are candies that have a hard sugar shell with a soft center. There is a clear distinction between a gummy and jelly candy. Gummy candy, as the name suggests, has a gummy texture. Not quite like chewing rubber bands or calamari, but certainly more elastic than any other soft candy. Since gelatin is the only material that gives that texture, by definition, gummies are made with gelatin. Jelly candies are solidified using carbohydrates, not proteins. So, a jelly bean center is usually made with corn starch. Other jelling ingredients are pectin, tapioca, and potato or arrowroot starch.
