Summary

Master Data Management (MDM) is a method of helping organizations in linking all critical and important data to a master file. MDM is the process of the collection of best data management practices. The benefits of the Master Data Management (MDM) model increase as the number and diversity of organizational units, the role of workers, and the expansion of computing applications. MDM may be more valuable to large or complex businesses than small, medium, or simple businesses. Master data management can facilitate the operation of a variety of system architectures, platforms and applications
