Abstracts

Summary

Vacuum contactors utilize vacuum bottle encapsulated contacts to suppress the arc. This arc suppression allows the contacts to be much smaller and use less space than air break contacts at higher currents. As the contacts are encapsulated, vacuum contactors are used fairly extensively in dirty applications, such as mining. Vacuum contactors are also widely used at medium voltages from 1000-5000 volts, effectively displacing oil-filled circuit breakers in many applications.

The global Medium Voltage Vacuum Contactors market will reach Volume Million USD in 2018 with CAGR xx% 2018-2025. The main contents of the report including:
