## Abstracts

### SUMMARY

Data center IT asset disposition is in development phase with a highly prosperous future, owing to the ubiquity of electronic devices that need proper disposing in order to preserve the environment. There are plenty of opportunities for the existing players, with most of them implementing aggressive remarketing strategies to add to their enterprise level customers as well as focusing on incrementing their output in terms of remarketed products sold. For instance, CCS providers such as Facebook Inc., Amazon Web Services Inc., Google Inc., Microsoft Corporation, and Apple Inc. have employed ITAD programs and procedures to dispose discarded assets in order to efficiently manage their unusable IT assets. This strategy enables them to comply with the regulatory policies pertaining to the environment and increase their returns.
