SUMMARY

Electric Forklift refers to a powered industrial truck used to lift and move materials short distances, which is powered by electricity. Majority of electric forklifts are powered by batteries, which are used as source power to drive the motor driving motor and hydraulic systems to travel and load and unload operations. Compared with internal combustion forklifts, electric forklifts have advantages such as less pollution, easier to operate and higher energy efficiency. Along with the development of economy and the enhancement of environmental protection consciousness, the industry of electric forklift has experienced a rapid growth.
