SUMMARY

Building Energy Management System (BEMS) is emerging as an important tool to minimize energy consumed by buildings. The BEMS is a system that can help building operators to monitor and control building systems. It is a combination of hardware, software and services and is utilized to achieve improved energy efficiency within the building by controlling building systems such as heating, ventilation, air conditioning and lighting. The rising fuel prices and climate change are two major factors that are driving the market for BEMS
