SUMMARY

A Suspended Ceiling is a type of finish system that is hung below the ceiling structure within a room or building. It may be suspended from a roof or ceiling deck, which consists of structural framing joists that support loads above and below the deck. The majority of Suspended Ceiling systems are made up of steel grid and acoustical tiles, though other materials can also be used. Metal hanger wires are used to suspend these systems anywhere from three inches to more than a foot (7.6 cm to 30.5 cm) below the deck.
