## Abstracts

### SUMMARY

Smartphone Cover Glass is usually aluminum silicate material. With screen sizes increasing, smartphones continue to lead total area demand in the cover glass market; however, as the markets for smartphones and tablets mature, cover glass industry revenue growth is declining from 39 percent year over year in 2013 to 11 percent in 2015. While the overall cover glass market growth is falling, increasing popularity of the Apple Watch is leading to growth in smart watch cover glass shipments, according to IHS Inc., a global source of critical information and insight.
