### Summary

A facsimile (commonly referred to as a fax) is a production of an exact copy of a document by electronic scanning, and the subsequent transmission of the resulting data. Faxes are transmitted over ordinary phone lines using fax machines. In a typical fax transmission, the document to be faxed is placed in the document feeder of a fax machine and the telephone number of the destination fax machine is dialed. In a very short time, a replica of the document is received at the destination fax machine. By their very nature, faxes can contain any information that appears in written form.
