SUMMARY

Decorative laminates are laminated products primarily used as furniture surface materials or wall paneling. It can be manufactured as either high- or low-pressure laminate, with the two processes not much different from each other except for the pressure applied in the pressing process. High Pressure Laminate (HPL) is composed of resin-impregnated Kraft paper, decorative paper face material and a clear melamine-impregnated overlay. These sheets are bonded at pressures greater than 1000 pounds per square inch and temperatures approaching 300 F (149°C). HPL is available in hundreds of solid colors, wood grains and abstracts with multiple finishes to select from as well.
