SUMMARY

A videoscope is a flexible inspection instrument that consists of a flexible insertion tube with a video display at one end and an objective lens at the other. The image is produced using a CCD camera chip 1/10th inch or smaller in diameter. The image is relayed from the inspection area to the video display electronically. An internal fiber optic light guide, or LED lighting at the objective, is used to illuminate the area being inspected. Industrial videoscopes are used for inspection of areas that are difficult or impossible to view without dis assembly or destruction of the item to be inspected.
