Summary

Physical Security Information Management (PSIM) is a category of software that provides a platform and applications created by middleware developers, designed to integrate multiple unconnected security applications and devices and control them through one comprehensive user interface. Beyond the time-saving and efficiency benefits of automation, PSIM enables modern business processes that are essential to any modern security department. For organizations, this includes regular reports, incident logs, continuous process improvement initiatives, training drills, system healthcare checks, and much more.
