## Abstracts

### SUMMARY

Video Wall is a special multi-monitor (or a single large screen) setup that consists of multiple computer monitors, video projectors, or television sets tiled together contiguously or overlapped in order to form one large screen. Typical display technologies include LCD panels, LED arrays, and rear projection screens (DLP). Video Wall Controller is the core component, which is connecting the computer directly to the video box for instant display on a large Video Wall. No special hardware is required, only a high resolution high speed transmission cable (DVI or HDMI or DisplayPort) is required to transmit signals from the computer to the video box. The video box tiles together a group of small panels to form a large video screen.
