### SUMMARY

Pediatric hearing aids are designed for children. These devices amplify the sound for the wearer with the aim of making a speech more intelligible and to correct impaired hearing as measured by audiometry. Children's learning and living environment should be considered for using hearing aids in children. They should be clearer. The Pediatric Hearing Aids Market produces the devices in various styles and sizes, including in the ear, behind the ear, in the canal, and completely in the hearing aids. Volume control, telecoil, clipping, Bluetooth, programmability, remote control, FM, etc are some of the features in the hearing aid devices.
