SUMMARY

Steel wire rope is a piece of machinery which is widely used in construction, mining, oil & gas extraction and other areas. Usually a steel wire rope is composed of wires, strands and a core, which is made of fiber or steel. The purpose of the core is to provide support and maintain the position of the outer strands during operation. The wires are predominantly constructed from high-carbon steel and stainless steel. The wires are twisted to form strands and they designate the strength of the steel wire rope.

The main contents of the report including:

Section 1:

Product definition, type and application, global and United States market overview;

Section 2:

Global and United States Market competition by company;

Section 3:

Global and United States sales revenue, volume and price by type;

Section 4:

Global and United States sales revenue, volume and price by application;

Section 5:

United States export and import;

Section 6:

Company information, business overview, sales data and product specifications;

Section 7:

Industry chain and raw materials;

Section 8:

SWOT and Porter's Five Forces;

Section 9:

Conclusion.
