SUMMARY

Alternative proteins, such as plant-based meat substitutes and edible insects, provide a substantial amount of protein but require less natural inputs to produce than the most common protein sources, meat and fish. Composed of different sequences of amino acids, proteins are found in almost all whole foods. Protein is responsible for building lean body tissue and providing the elements needed for digestive enzymes. Certain plant-based proteins offer functionality but pose flavor challenges. Pea protein is becoming more popular in part because of its neutral flavor.

The global Neutral Alternative Protein market will reach xxx Million USD in 2020 with CAGR xx% 2020-2025. The main contents of the report including
