SUMMARY

Non-magnetic drill collar is the use of N1310 low carbon alloy steel, the material is through rigorous analysis of chemical composition of forged. The mechanical properties of the material can ensure the hardness, toughness, and impact value and corrosion resistance to meet the standard, with good low permeability and good mechanical processing performance. Because all magnetic measuring instruments are used to measure the direction of the borehole, the induction is the earth's magnetic field, so the measuring instrument must be a non-magnetic environment. However in the process of drilling tools often is magnetic, magnetic field, magnetic measurement instrument of, cannot be correct trajectory measurement data, using non-magnetic drill collar can be implemented without magnetic environment, and has the characteristics of drilling of the drill collar.
