Summary

Pneumatic tools are powered by compressed air and include drills, hammers, sanders, polisher, etc. Pneumatic tools are widely applied in automotive industry, manufacturing industry and various constructions. Besides, pneumatic tools are more and more popular in diyers. Pneumatic tools last for hours of uninterrupted intense work and have longer useful life than electric tools. Because they do not have a motor, they cannot overheat and overload. In fact, they do not need any specific maintenance. Compared to traditional hand tools, pneumatic tools are easier to operate and can be used in some special work environment. While there is no risk of electrical stroke or explosion, pneumatic tools are the safest and can be used with no hesitation also in damp places or wet surfaces. Another advantage of pneumatic tools is economy because the compressor for the production of certain kinetic energy uses less electricity than an equal sum of electric tools.
