Abstracts

Summary

CTP refers to the process of imaging digital printing data (created by a computer) directly onto a printing plate. A thermal CTP recorder uses a high-power near-infrared laser to image digital printing data onto specially processed aluminum-base printing plates. CTP completely eliminates the need for film output and subsequent film to plate image transfer. Since processing is completely digital, there are no variations between plates, which results in superior printing quality.

The global Thermal CTP market will reach xxx Million USD in 2017 with CAGR xx% from 2018-2025. The main contents of the report including:

Global market size and forecast

Regional market size, production data and export & import
