These flavors are extracted through processes like cold pressing, steam distillation, or solvent extraction, without using any synthetic chemicals or solvents. Botanical flavors are increasingly becoming popular among health-conscious consumers who prefer natural and organic products.

The use of botanical flavors is widespread, with the industry catering to several sectors such as the food & beverage and personal care industries. The global botanical flavors market is projected to reach a size of US\$7876.7 million by 2022, growing at a CAGR of 8.7%.
